

MICRO-TUBING

For more info visit our website www.tempoinc.com

Features:

- Poly tubing manufactured from virgin linear low density polyethylene.
- Poly tubing has a density of 0.93.
- Vinyl tubing manufactured from virgin flexible PVC.
- Vinyl tubing has a density of 1.44.
- Contains a minimum of 2.5% carbon black for UV protection.
- Available in coils ranging from 50 feet to 2,000 feet.
- Self coils (no spools) or wound on to cardboard / chipboard spools.
- Tight manufacturing tolerances.
- Made in the USA.

Part No.	Material	Inside Diameter	Outside Diameter	Wall	Spool	Coil Size	Max Pressure
T185/2000	LLDPE	0.125"	0.185"	0.030"	Cardboard	2,000'	50 psi
